

On-site temporary housing, nationwide since 2004.

Furnished travel trailers delivered and set up on the policyholder's own property, the job site, or the disaster zone. One contact, direct billing, and a documentation package built for the file. Staged near you, wherever the loss is.

WHO WE PLACE HOUSING FOR

Insurance and ALE	Adjusters, carriers, and housing coordinators. On-site placement under Additional Living Expenses.
Housing companies and TPAs	Use us as your on-site vendor for the files a building cannot serve. You keep the relationship; we take the placement.
Workforce	Oil field, energy, data center, construction, and utility crews. One contract, one invoice.
Disaster response	Residents on their own lots and crews on staging yards after a declared event.
Medical and transitional	Travel clinicians on assignment and families near a hospital.

WHAT THE ADJUSTER OR COORDINATOR GETS

- One named contact from first call to pickup
- Direct billing to the carrier, TPA, housing company, or employer; the family pays \$0 out of pocket on a covered claim
- Placement tracked against the policy's ALE limit
- Local rules on a temporary RV checked before delivery; temporary-use permits handled where required
- Utility connections completed by licensed, insured contractors from our preferred vendor network
- Site conditions documented at setup and again at takedown
- Scheduled service visits for the length of the stay
- Units that sleep 2 to 10: kitchen, bath, real beds, heat and air, furnished
- Optional housewares package and aerial documentation from the same contact
- Set up as a vendor, not a landlord: we bring the unit to the policyholder's address

THREE SERVICES, EACH ON ITS OWN

- **Temporary RV Living:** the trailers, delivery, setup, and service.
- **Temporary Housewares:** boxed housewares packages shipped nationwide.
- **LossMap:** aerial and photo documentation of the property.

HOW A PLACEMENT RUNS

1. Open the file

One call or email with the property, the household size, and the claim or project contact.

2. Site and rules

We confirm the property can take a unit, check local rules, and pick the size that fits.

3. Delivery and setup

Licensed contractors deliver, level, and connect the trailer. We document the site.

4. Stay and close

Scheduled service, status on your cadence, pickup and closing documentation when the file closes.
